FOUR FLOWER VASE FURNITURE / LIGHTING / ACCESSORIES

Matti Klenell on the design "One of the strongest characteristics of glass is its transparency. Another is its seductive beauty. With this as a starting point I set out to create a flower vase which would be beautiful with or without flowers. The vase design is enhanced by reflective light and the layer on layer glass construction. And the fact that it actually ended up being four different sized flower vases in one, is a delightful bonus."

PROCESS

The vase is 100 % hand made. The vase is mouth blown, holes are drilled into the glass and hand polished for a smooth finish.
